

West Cumbria Sites Stakeholder Group

Summary Report to the WCSSG March 2011 Socio Economic Sub committee

Key Items Discussed

NMP socio economic activities
NDA socio economic activities
Sellafield Ltd socio-economic activities
Britain's Energy Coast Business Cluster supply chain perspective
Purpose of the committee

Issues/Findings

- The December socio economic sub committee meeting was postponed to allow for the main focus of the WCSSG meeting on January 6th to cover socio economic issues and help in raising the group's profile.
- The NDA provided a presentation which set out to explain the NDA's role in the context of the estate, engaging with the supply chain.
- Sellafield Ltd provided a presentation which looked at the company operating in a contractual environment, looking at the socio economic benefits being delivered and the future in terms of the acquisition strategy.
- LLWR provided an update on their socio economic activities.
- Britain's energy coast business cluster gave an overview of the work which they are committed to deliver.
- At the 12th meeting the purpose of the socio economic sub committee was discussed, members all agreed it would be beneficial to ensure that items and issues were included high on the agenda at the main quarterly WCSSG meetings. The group felt this would raise the profile of socio economics and be beneficial to the cause.

- A further socio economic meeting was agreed to be held to receive information about indicators and proposed monitoring of the socio economic section of the Sellafield Performance Plan. If the processes were acceptable the SSG meetings would be requested to take on the monitoring of the plan and ensure socio economic indicators are given the importance they need and are one of the first items on the SSG agenda.
